

ALS26

Absolute Linear Magnetic Sensing Head

The Absolute Magnetic Sensing Head ALS26 combined with BOGEN's magnetic scales offer cost-efficient magnetic measurement solutions for many industrial applications where movements or positions have to be measured. ALS26 can be used for linear measurements up to 32700 mm length with a resolution up to 1 μm . The measuring head provides both BiSS-C and SSI outputs or a Panasonic output and an additional incremental output for speed feedback. Thanks to IP67 class protection and rugged mechanical design ALS26 can be implemented even in harsh industrial environments.
